JOTTINGS.

Try a Prize of Washoe cigar.
Order your ice cream at the Palace Bakery.

A healthy and nourishing drink—"milk shake." The finest at the Palace Bakery.

Buy your firewood of J. F. Aitken who will cut it any length desired and deliver it to any part of the town.

The Riverside Hotel is the place to go for a fine meal. It can be had on the line of the Central Pacific road.

George Becker's Granite Saloon is the place to go for a glass of Pacific or Frederickburg beer and a nice hot soup lunch.

C. J. Brooks' stock of fireworks are attracting the attention of all the small boys in town. Try his 5 cent cigar, the best in town.

Blackberries, currants, strawberries, peaches, apricots, plums, new potatoes, cucumbers and string beans at E. C. Leadbetter's.

J. J. Becker's Chicago Saloon will be found to be a cool, quiet place to go for your midday lunches and a schooner of either Boca or Sacramento beer.

Desk folios, blotting paper, bristle board, drawing paper, village cloth for tracing, and carpenter's drawing pencils at C. A. Thurston's news depot. Also a full line of Fourth of July fireworks.

Synopsis of News.

Produced from the laxative and nutritious juice of California figs, combined with the medicinal virtues of plants known to be most beneficial to the human system, acts gently on the kidneys, liver and bowels, effectually cleansing the system, dispelling colds, headaches, and curing habitual constipation.

Here Are a Few of My Prices for

No 7 tea boiler, 12 tin. \$1.75
No 7 tea kettle, 12 tin. 1.00
10 quart milk strainer pails. 75c
2 quart cloths. 25c
1 quart Mason fruit jars, per dozen. 1.50
1 pint Mason fruit jars, per dozen. 1.00
1 quart fruit cans, per dozen. 1.50
Rim door lock, white knob. 50c
1/2 in water pipe, per foot. 25c
No 2 clothes wringer. 2.50
Coal oil per case, 10 gallons Star. 3.25
Stove jars per gallon. 25c
Sifted hay forks—very best. 2.00
Galvanized iron washbasin, 2 in diam top. 2.00
Sifted water pails, 12 tin. 1.00
Rice cloths baskets. 50c
Pioneer white lead, per pound. 75c
Horse shoe nails per box. 25c
Hopkins' cloths, furnished and set for proof. 10.00
2 pounds of nails. 4.50
Devoes paint colors, 3 lb cans. 50c
No 7 cook stove, nickel finished, without furniture. 10.00
J. J. QUINN.

A Few of J. J. Quinn's Prices.

La Alexander Humboldt Imported Havana Cigars, the finest cigar made, 5 in long, each. 25c
Laffor de K. Fulton Imported Havana Cigars, 5 in long, 5 in wide, 25c
Estrella, Conqueror, Roby, La Figaro, Rothchild, 5 in long, genuine Key West Cigars, each. 10c
All the above Key West brands in 1/4 in goods, 3 for. 45c
Horse shoe, Star, Climax, Love and several more staple brands of plug chewing tobacco, by the box of 25 lbs per lb. 45c
Peacock Fine Cut Tobacco, the finest, per lb. 75c
Vanilla Hair Cream, Kent Jax, Virginia Bright, Caporal Cigarettes per box of 50 packs. 25c
Or 100 packs. 4.50
No attention paid to would-be competitors who have half a dozen prices for the same tobacco cigars and who fill their few key West boxes with 1/2 domestic cigars for 180c Key West cigars.

Not having any rent and many other expenses, and not depending on the business, enables me to sell all goods in that line so low no competitor in America can live and still make the same quality of goods without a loss, and eventually have their place closed by the Sheriff. Talk is cheap, but it can't be taken in.

Epiph.

The transition from long, lingering and painful sickness to robust health marks an epoch in the life of the individual. Such a remarkable event is treasured in the memory and the agency whereby the good health has been attained is gratefully blessed. Hence it is that so much is heard in praise of Electric Bitters. So many feel they owe their restoration to health to the use of the Great Alterative and Tonic. If you are raved with any disease of the Kidneys or Liver or Stomach, of long or short standing you will surely find relief by the use of Electric Bitters. Sold at 25c per bottle at Hodgkinson's drug store.

Their Business Booming.

Probably no one thing has caused such a general revival of trade at Hodgkinson's drug store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this very valuable article from the fact that it always cures and never disappoints. Coughs, Colds, Asthma, Bronchitis, croup and all throat and lung diseases quickly cured. You can test it before buying by getting a trial bottle free; large size, 50c. Every bottle warranted.

Bucklen's Arnica Salve.
The best salve in the world for cuts, bruises, oozes, ulcers, salt rheum, fever sores, chapped hands, chilblains, corns and all skin eruptions, and positively cures piles or no pay required. It is guaranteed to give perfect satisfaction, money refunded. Price 25 cents per box. For sale by Hodgkinson & Co. derrydry

Coughs, Hoarseness, Sore Throat, etc., quickly relieved by Brown's BRONCHIAL TROUSERS. A simple and effective remedy, superior to all other articles for the same purpose. Sold only in boxes.

MOUNTAIN RESERVOIRS.

The Water Storage System of the Sierras.

Placer mining in California gave an immense impetus to the development of the water systems of the Sierra Nevada, and it is doubtful if any part of the American continent is so well provided with dams and reservoirs as the region at the headwaters of the Yuba and American rivers. So much interest has been manifested in this question, and so many reports, correct and incorrect, have been set in motion, that the GAZETTE has taken pains to gather exact information on this important subject for the benefit of those interested and the world at large.

While gold mining was in progress every opportunity was sought by the big companies that had become possessed of the large gravel banks at Dutch Flat, Gold Run, You Bet, Quaker Hill and other places to secure the small lakes and meadows that dot the sides and summits of the Sierras, from the size of half an acre up, and all such places were being rapidly changed into reservoirs. No one can have any idea of the number of such places without months of travel over the roughest kind of country. In addition to these thousands of little lakelets, many dozen of which might burst without creating an alarming flood, there are hidden away in the fastnesses of the Sierras some of the largest artificial lakes in the world, held by dams ranking with any in existence, in size, cost and construction. The highest dam ever built in California, and, we believe, the highest ever built on this continent up to 1880, was the

ENGLISH DAM.

In Musco Valley, on the very headwaters of the middle Yuba. It was first created in 1856 of logs, filled up with earth. In 1878 V. G. Bell, the manager of the Milton Ditch Company and the mines forty miles below at Sweetland, replaced the old dam with a magnificent stone structure 115 feet high at a 300 feet wide at the bottom. It stood for several years, but went out, tearing the country up on its way to the valley and leaving immense deposits of large trees, rocks and beds of gravel in its track.

FRENCH LAKE.

Is held by a dam sixty-four feet high for the benefit of the mines at San Juan. It lies nearly between the English dam and Fournide Valley, and is filled by a branch of Canyon Creek, a tributary of the middle Yuba. Its lake covers 500 acres of flat, below French Lake, also on Canyon Creek is

BOWMAN'S DAM.

Ninety feet high with a lake behind it over two miles long.

MEADOW LAKE.

Has a dam at its mouth over fifty feet high, which increases its size and depth a hundred per cent. There is a dam sixty feet high, which was created in 1877 across the South Yuba, that makes a lake a mile and a half long in

FOURDE VALLEY.

Not six miles, as claimed by some papers. It is neither the largest nor the most important in the mountains. Its waters are owned by the South Yuba Canal Company, and go to You Bet, Dutch Flat, etc.

On the eastern slope nature has been much more kind in distributing natural reservoirs than on the western side of the Sierras.

TAHOE.

Alone, is worth all the reservoirs that can ever be made by masonry, and it is so safe, so easily controlled, has such an extensive watershed that it is almost priceless as a reservoir. A cheap wooden dam six feet high at its outlet would hold back a body of water covering nearly two hundred square miles of surface that can be drawn upon and carried down the Truckee, or in ditches, over an empire of land from its level to one and two thousand feet below it, embracing timber, grazing, farming and garden land of every variety.

WRECKER AND INDEPENDENCE
Are raised by small dams and the water drawn off to float logs down the Little Truckee for the Boca mill.

DONNER LAKE.

Is also held back and its waters controlled for artificial purposes.

MARLETTE LAKE.

Has been raised higher than any other lake on the eastern slope and its waters diverted from their natural course into Tahoe to supply Virginia City. A fine stone dam 25 feet high has increased it from three or four acres to over 300 in size. It is 1,500 feet higher than Lake Tahoe. Besides the natural lakes the mountains are full of little valleys where a small outlet would hold back immense quantities of water. These valleys have been nearly all bought up and are used as dairies in summer by parties who spend their winters on farms in the foothills.

Prosser Creek has several remarkably fine reservoir sites where short and low dams would make lakes several miles in extent. They could be made perfectly safe, too, if not by main strength their flood-gates might be fixed in tunnels at one side, like the dam put in by Mr. Parkinson on Rock Creek above Squaw Valley in Humboldt county. There need be no danger if proper care is used and the results should not be so great that the work should not be delayed much longer on account of any remote danger of that sort.

Heavy Damage Suit.

Colonel Hardin of Humboldt county, by his attorneys, Messrs. Leonard and Lindsay of Reno and J. H. McMillan of Winnemucca, has brought suit in this county against the Southern Pacific Railroad Company for \$50,000 damages for injuries received in a smash-up near the Summit of the Sierras eight months ago.

A Change of Base.

It is reported that Russell & Bradley of Elko have removed their herd of cattle, or the most of them, to Idaho, and that they intend to go out of the cattle business in Western Nevada and into sheep. They claim that there is more money in sheep than cattle.

BREVITIES.

Local and General Intelligence.

E. C. Northrop is selling carpets at cost.

Now is the time to buy dry goods while E. C. Northrop is selling at cost. Read Theodore Gebhardt's notice in the 50-cent column of to-day's GAZETTE.

Telegrams for Sparks & Tinnin and Charles Chappelle are at the Western Union office.

It is reported that several hundred cords of wood were burned near Incline last Saturday.

Read, F. Kolster's new ad. in another column and give him a call. He knows his business.

Last evening W. O. H. Martin received another large consignment of Sierra Valley butter.

C. W. Borton this morning received his commission as Brigadier-General of Nevada National Guard.

Yesterday's session of the Board of County Commissioners is said to have been the briefest for some time.

Attention is called to the bills allowed by the County Commissioners Monday in the GAZETTE's advertising columns.

C. D. Van Duser, a graduate of the Normal Department of the State University, is night observer at the Experiment Station.

The river is nearly dry, and the stretch arising from the vicinity of the bridge, where the sewers empty, is becoming quite a nuisance.

The Essex mill steam wagon is to haul the Floral Car, the Car of State and the two steam fire engines in the Fourth of July procession.

If the water that run to waste last Spring could have been stored until now, it would have added much to the health, wealth and general prosperity of the community.

The ladies having in charge this evening's entertainment for the benefit of the Public Library are putting forth every effort to make it a financial success, and are deserving of all encouragement. Buy a ticket whether you attend or not.

Don't forget the presentation at McKissick's Opera House to-morrow evening of "Nobody's Claim" by the Ben Cotton troupe. Wherever this company have played they have never failed to receive the cordial endorsement of the entire press.

A DEATH VALLEY MYSTERY.

Sacks of Ore Discovered That Yield a Handsome Return.

The Inyo Independent contains the following: Not long since a prospector was exploring in the Death Valley country. He camped in the mountains at a spring and stayed at the same place for some weeks. His pack mules strayed among the mountains and when he went in search of them they were found near a spring where there was good grass. The miner went to the spring to get water and near by saw part of an ore sack sticking out of the ground. He removed some of the dirt and found that the sack was full of ore; and a little further search brought to light four other sacks of ore. All these sacks were very rotten and had evidently been in the ground a long time. He had the ore milled and from the five small sacks, each containing about seventy pounds of ore, he realized thirteen hundred dollars. Not long after finding it the miner met an Indian who is well known in that region, and asked him what had become of the men who had hidden the ore, and the Indian replied "Mebbe so Indian heap kill 'em." There is good reason to believe that this is a fact. Several years ago some prospectors went into that country and disappeared. It is believed that they found a rich ore body and had taken out some ore when Indians attacked them and they buried these ore sacks, and attempted to escape, but were killed somewhere in the Death Valley mountains. Men are now searching for the ledge where this ore was taken from. In a small canyon on the east side of Death Valley is a small spring; prospectors went there for water and a short distance above the spring found croppings that are very rich in gold. There are slight traces that a little work had been done there at some former time. The vein is being developed at present unless the men have quit during the very hot weather that prevails there at this season.

WHAT SUPPORTS GARSON.
Money Disbursed Monthly at the Capital.

Carson is prosperous, and why should she not be? She sucks liberally from the public teat, besides what she gets from the V. & T. Company. The total disbursement for the month of May for labor and supplies was \$44,009 87. Of this amount the V. & T. distributed \$23,000 for labor in the shops; the box factory and flume \$3,000; the mint \$6,000; at the Capital building they paid out for salaries \$7,742 80; the Orphan Home paid out \$286 66 for salaries and \$406 05 for supplies; and the prison paid out \$1,075 66 for salaries and \$2,408 60 for supplies. This amount will be increased about \$4,000 or \$5,000 next month, when the Mint is full-handed.

PERSONAL.

County Commissioner Merrill is reported dangerously ill.

Miss Eva Quail left yesterday morning for the sea-board.

Ross Levers was down from his Washoe Valley ranch yesterday.

J. H. McMillan, the Winnemucca attorney, arrived on last evening's express.

A. C. Pratt of Douglas county succeeds Pearis Ellis as Deputy Secretary of State.

Colonel E. D. Boyle of Virginia was a passenger for Salt Lake on this morning's train.

Al. White and wife of the Palace Hotel returned this morning from a trip to Webber Lake.

J. J. Bag, conductor of the V. & T. accommodation train, returned this morning from a business trip to Florida.

Mrs. Poor returned Saturday evening from a visit to her son and family in Modoc county, Cal., all of whom accompanied her to Reno.

Dr. Lewis and party who took a trapping trip via Little Valley, Incline, Ho Springs and Truckee, returned to Reno yesterday afternoon.

JOHN SUNDERLAND.

GREAT REDUCTION IN PRICES!

OF

Clothing and Gents' Furnishing Goods,

LADIES' MISSES' AND CHILDREN'S

BOOTS AND SHOES

Don't Fail to Call and Examine Goods and Prices Before Purchasing.

Ladies' French Kid Boots reduced from \$5 to \$4, and down as low as \$2 per pair.

Ladies' Canvas Bala and Button for \$2.

Children's Shoes from 50 cents up.

Men's Wool Pants for \$3.

ALL GOODS WILL BE SOLD 20 Per Cent. Lower than Any House on the Coast.

MY MOTTO—The Greatest Value for the Least Money.

J. SUNDERLAND.

THE MINT.

Appointments Made by Superintendent Wright.

Superintendent S. C. Wright has made the following appointments in the Mint: T. R. Hofer of Ormsby, Chief Clerk; Allen C. Bragg of Washoe, Cashier; L. L. Elrod of Ormsby, Bookkeeper; C. A. Witherell of Ormsby, Weigh Clerk; H. J. Humphries of Humboldt, Record Clerk; Ollie Bray of Ormsby, Assay Clerk; Geo. W. Keith of Lyon, Assistant Coiner; Geo. McLaughlin of Ormsby, Pressman; Archie Allen of Storey, Engineer; E. F. Hall of Storey, First and Second Clerks; S. D. King, Captain of the Watch; D. C. Sheehan of Storey, E. L. Buckingham of Eureka, Chas. Wilson of Storey, A. K. Lamb of Washoe and F. B. Allen of White Pine, as Watchmen; Joseph Wilson of Esmeralda, Deposit Melter; Carson Burlingame of Eureka, helper; C. A. Appleberg of Ormsby, watchman and helper; E. B. Cutts of Lincoln, blacksmith; E. C. Knopp of Ormsby, sweep man; M. R. Wing of Storey, yardman; J. H. Henny of Storey, coal man; Wm. H. Adams of Ormsby, Assistant Assayer; Chas. A. Hofer of Ormsby, Purveyor; Albert A. Phipps of Storey, Dissolver; J. M. Wright of Lander, helper; and Richard Brown of Elko and S. S. Fairbanks of Nye, helpers in the coining department.

There are several more clerks to be appointed and a good many more appointments to be made in the coining and melting departments, but they will not be made until the 1st of August.

John Sunderland's Prices.

By reference to John Sunderland's new ad. in to-day's GAZETTE it will be seen that he does not intend to be undersold by any dealer in men's, boys', ladies', misses and children's shoes, and men's, youths' and boys' clothing and furnishing goods. Make a careful examination of his reduction of prices in ladies' and children's shoes, and you will see that goods of that quality have never been sold anywhere near as low on this side of the Sierras.

Attention, Baseball Players!

Yesterday the Commissioners passed an ordinance prohibiting any person or persons playing ball on the streets and other public places within the town limits of Reno. This was not done with any malice toward baseball players, but for the purpose of protecting children and others from accidents which frequently occur from the throwing or batting of a hard ball. The ball club should rent a suitable place for the game and do their playing and practicing on it.

The Fourth of July.

The Fourth of July Committee of Arrangements has nearly completed its labors and is engaged now in executing the plans laid down. Reno will have a fine time on the Fourth and make the day pleasant for all who come here. The steam wagon will be a feature of the parade, as not many people have ever seen one. Come and have a good time; you won't regret it.

A Good Recommendation.

The Board of County Commissioners yesterday recommended the Governor to appoint James Mayberry as Water Commissioner for this district. Should the Governor make the appointment, the GAZETTE believes it would give general satisfaction, for Mr. Mayberry is one of the few men thoroughly posted on the water question.

Good News.

Superintendent Wright received a telegram yesterday from Director Kimball authorizing him to pay the same price for bullion that is paid in Philadelphia. This means that the Carson Mint will no longer be unjustly discriminated against.

What the Drinker Gets.

The Homer Index says: A bushel of corn will make \$25 worth of whiskey, as it sells by retail. If the Government gets its revenue in full—which it seldom does—it receives \$1 00; the farmer's average receipt is 40 cents; the railroad as carrier gets \$1; the retailer \$10; and the drinker gets drunk and 6 days in jail.

Somebody has evidently been posting Townsend on the effects of strong drink.

THE N. & C.

An Interesting Report From the General Manager.

E. Gest, Manager of the N. & C. Railroad, has filed with the Railroad Commissioners at San Francisco his report. It comprises thirty-four pages of statistics. The report says that there are neither stockholders, directors nor corporate officers. The road is 70 miles long—23 miles in Nevada and 47 in California. The office and principal place of business of the company is at Reno. The operative officers are: Frank R. Lewis, Auditor and Treasurer; Erasmus Gest, General Manager; John M. Fulton, General Freight, Passenger and Ticket Agent; S. D. King, General Attorney; L. F. Warner, Chief Engineer. The liabilities accruing up to and including December 31, 1888, are \$15,152. The expenditures during the year 1888 are: For construction, \$174,046; for equipment, \$16,867. Grand total cost of construction and equipment up to December 31, 1888, \$787,166; cost per mile, \$11,245. Total gross earnings, \$87,815. The road has been thus far operated without casualties.

Taxes Will Allowed.

The Commissioners yesterday allowed the following bills against the town of Reno:

S. W. Upson, watching. \$36.00
Geo. E. Holesworth, sewer work. 9.00
F. Aitken, sprinkling. 20.00
C. F. Jaques, supplies. 17.27
Reno E. Co., electric lights. 60.00
W. L. Lock, blacksmith. 10.25
R. W. White, repairs. 2.00
Polson & Wells, supplies, sewers. 145.00
T. K. Stewart, surveying. 23.00
C. C. Downing, printing. 35.00
Reno Water Co., water. 50.00
W. O. H. Martin, sewer supplies. 22.50
Reno M. & L. Co., supplies. 37.22
R. M. Smith, watching. 13.00
F. W. McWhorter, supplies. 4.00
Reno Fire Dept., dist. 436.53
J. J. Douglas, et al., sewer work. 348.50

A. Nelson, the enterprising free employment office agent, and well-known for his fine cigars, tobacco, pipes and yankee notions, has taken the agency for Dr. Wiley's Discovery, the greatest liniment on earth, for rheumatism, coughs, colds, catarrh, asthma and bronchial affections. Also a full line of "Diamond" spectacles and eyeglasses. I buy goods as cheaply as anyone in Reno and can therefore defy competition.

Notice.
On and after Monday, June 24, I will sell soda and sarsaparilla at 75 cents per case (two dozen in a case). Send in your orders.
GEORGE BECKER.

A Fortunate Druggist.

Mr. Edwin W. Joy for many years and now a prosperous druggist on the corner of Stockton and Market streets in San Francisco, probably never dreamed of rivaling in wealth the medicinal kings of the country. But various circumstances having been floating around to the effect that he has struck it big, an Examiner reporter was detailed to unearth the cause, and after much difficulty unraveled the following story:

It seems that about seven years ago an English physician, a great student of botany, located in this city. His practice was not extensive, and yet the few cases that came to him attracted no little attention. His success seemed to be in the treatment of liver and kidney disorders and vitiated blood. In fact his ability to cope with these common complaints was marvelous. He seemed almost infallible, and his quiet modest methods and his well-kept secret was as much a mystery as himself. After his departure about a year later Mr. Joy determined to fathom the secret, and copying all the prescriptions he had filed for the erratic doctor he began a systematic analysis. In his examination he discovered running all through the prescriptions for liver and kidney troubles, vitiated blood and stomach disorders a couple of vegetable extracts indigenous to California, so simple and so well known under homely every day names to every school boy as to entirely dispel the suspicion that they were the active principles involved. So certain, however, was Mr. Joy that he had discovered the secret, that he embodied the new elements in a preparation of sarsaparilla to disprove the tale, and put it before his customers under the modest name of Joy's Vegetable Sarsaparilla. Immediately the same marvelous stories came back of the astonishing effects, and the mystery was solved, and the tale it has created has already caused it to step into prominence, and orders pour in daily from all over the coast. And thus another California industry leaps into existence.—S. F. Examiner.

BORN.

WRIGHT—In San Francisco, July 1, 1889, to the wife of A. R. Wright, a son.

PALACE DRY GOODS HOUSE.

THE GRAND FOURTH

—AT THE—

PALACE DRY GOODS AND CARPET HOUSE

W. F. McLAUGHLIN, Sec'y.

Half Rates will be given on all
Railroads.

One Fare for all Points east of
Truckee and west of Winnemucca
on the Central Pacific.

Come and Enjoy Yourselves!

TIMING FLYING SHELLS.

How Uncle Sam Finds Out Just
How They Go.

The Bouleze Chronograph, and How It
Is Operated—What a Velocity of
Twenty-One Hundred Feet Per
Minute Really Means.

"Around the world in twenty hours!"
"You don't mean it."
"I do. That's just what a velocity of 2,100
feet per second means, and that is what this
gun will do for a second or two as sure as
guns are guns."
So spoke one of my naval friends as he
pointed to a gun long and slender as a tele-
scope, which an Annapolis (Md.) corre-
spondent to the New York World.

"But how can you measure any velocity
as great as that?"
"Easily enough," asserted the scientific
young sea dog. "Just wait until we get this
fellow into position and just shall see for
yourself how the thing is done."
Thus it came to pass that one morning, in
answer to a note from my friend, I found
myself landed on the long, rickety wharf of
the naval proving ground at Annapolis. A
less warlike-looking place it would be hard
to imagine. Two unpretentious frame build-
ings on a small hill, a barn, a bit of swamp
and a farm-house; but the stars and stripes
floating from a flag-pole marked it as Uncle
Sam's private property. I dived into the
larger of the two buildings. Through the
open door I saw on my right a long un-
occupied room from which my friend called to
me to come in. On the walls were cases
with guns, pistols and odd-looking instru-
ments, a desk, a table, a photographic
outfit and three massive wooden pedestals
on which stood instruments, each of which
an officer was busily engaged in adjusting.

"These are Bouleze chronographs," said
my friend, adding: "We are going to fire
just as soon as that schooner gets out of
range."
"Fire what?" said I, for I saw nothing
except some small arms. "The gun you
saw last week," he retorted, and then some-
body outside sung out: "Stand by!"
The somebody was a Lieutenant, with a
big red flag in one hand and a bluecoat in
the other.

"Ready, A!" "Ready, B!" "Ready, C!"
called out the three officers in rapid suc-
cession, when flash, rattle, down came the rods
of the chronographs. Bang! whizz-rush-
roar! and way out in the Chesapeake I
could see the splash, splash of the shot
miles away.

"A 2, 188," said some one, and turning I
saw the three officers bending over the
table, each carefully measuring a steel rod
about twenty inches long, its whole length
nearly covered by a thin zinc cylinder. "B
2, 188," "C 2, 188," they announced in turn,
which was entered in big books. The rods
were again measured and the entries
checked.

"Now," said my friend, "let me present
you to my fellow-workers and explain this
mystery." "Look out there!" "Out there!"
some hundred yards away was a ship with
some six or eight guns of various sizes and
shapes, all pointing towards a heavy butt of
earth one hundred yards from them. Be-
tween the guns and the butt were open
wooden frames, like big picture frames,
with wire laced back and forth across them.
While here and there raw telegraph wires
which finally entered the room in which we
were and connected with the chronographs.

"Now," said my friend, "here is the
whole thing in a nutshell. These chrono-
graphs consist of a couple of electro-mag-
nets and a little spring. The first mag-
net holds the long, zinc-covered steel
rod; the second holds a short steel rod.
The gun being fired, the shot cuts the wire
in the nearest frame, or screen, as it is tech-
nically called, and so breaks the circuit of
the upper electro-magnet, allowing the long
rod to fall. When the shot strikes the sec-
ond screen, the one furthest from the gun,
it breaks the circuit of the second electro-
magnet, thus allowing the shot-rod to fall.
This, after falling a short distance, strikes
the trigger of the spring knife. The knife,
being released, flies forward and makes a
dent in the zinc on the long rod, and so we
can measure the distance the long rod has
fallen before the knife marks it, and as this
space bears a distinct ratio to the time,
and as the time is exactly that taken by the
shot in passing over the known distance be-
tween the screens, we know the time and
hence the shell's velocity per second."

"But does not the short rod occupy some
time in falling and does not the knife take
some little time in striking the rod?" asked I.
"So it does, and the way we got round
that is this." Here he hung both rods to
their magnets. "See this key. If I press
it I break simultaneously the circuit of both
magnets and release both rods at one and
the same time. Thus, if I press the key,
down fall the rods. Now see this mark on
the zinc on the long rod. This mark made
by the knife, and is called the 'disjunctor
reading,' and it's from this mark that we
measure the distance that the long rod
falls. At any rate, that is the result prac-
tically, we take the difference between the
disjunctor reading and the reading given by
the shot, which gives the distance between
the two marks, and, as I said before, if we
know the distance a body falls we know the
time it was in falling and, consequently, the
time taken by the shot in going over the
known distance between the two screens.
We use the three chronographs as checks
upon each other; they are all connected
with the same screens and should give the
same results. The mean of the three is
taken as the actual velocity. Then, too, if
we had only the one it might fall twice, and
a shot would be wasted, and as this costs
for the eight-inch rifle about sixty dollars a
shot it is quite a consideration, even to
Uncle Sam. Now I believe I have told you
all there is to it!"

"But that shell did not go through that
young mountain of earth you are pleased to
call a butt before it went slipping along the
bay, did it?"

"No, the gun was sighted so as just to
clear the butt, and the shell was fired with
a view of determining its range. There are
a couple of observers stationed out near Bay
Ridge who mark on a plane table the line
through the first splash of the shot. The
intersection of this line on the chart with the
line observed here, gives the point where
the shot struck, and so we measure the dis-
tance."

A Lie as a Lie.

A big snake story comes from Mount
Holly, in Berkeley County, S. C. A party of
negroes were cutting upon a lightwood log
of large circumference and great length
when it suddenly began to move slowly
toward a creek about ten feet distant. The
negroes were stricken with terror, and they
at once dropped their axes and stampeded.
Dr. Byrd, in charge of the hands, tried to
recall them, but they continued in their
flight, without even once looking back. In
the meantime the log was moving slowly
toward the creek. As it fell into the water
the source of its power of locomotion was
revealed in a most astounding manner.
Hundreds of hissing serpents leaped forth
from their hiding place in the log and dived
forth in different directions in the water.
The snake was of the genuine water moccasin
species, varying in length from that of
a buggy spoke to a hoe handle. Dr. Byrd
and others stood by, watching the snakes
depart, and their going consumed fully
thirty minutes. Three of the negroes who
saw when the log began to move have not
since been heard from.

WONDERFUL LONGEVITY.

An Indiana Woman Hale and hearty at
103 Years of Age.

There resides with her daughter, Mrs.
Mary Atkins, at Greencastle, a nature's
noblewoman — Mrs. Catherine McMahon,
who was born in County Clare, Parish of Kil-
morey, Ireland, November 11, 1785. A corre-
spondent for the Indianapolis Journal spent
an hour in her company one day recently,
listening to her own account of her long
and worthy life, which is substantially as
follows:

She was one of several children born to
Daniel Cooney and Mariah Flanagan, who
died, the former at sixty-two and the latter
at eighty-two years of age. Two brothers,
Martin and James Cooney, died in Dubuque,
Ia., in 1873, the former lacking but five days
of rounding up his ninety-first year. The lat-
ter was in his ninety-eighth year. Another
brother, Thomas Cooney, older to James,
wandered off to Australia in early life and
his last end is unknown. In 1830, by the
death of her husband, Michael McMahon, to
whom she was married in 1813, she was left
a tenant of a one hundred-acre farm in
County Clare, the property of Thomas and
John Cahill. Her rental was forty pounds
sterling annually. Besides being King,
Queen, county, road and various other taxes,
then most burdensome than now. Eight
children were dependent on her, though two
sons helped greatly in the farm work.
She was a hard worker herself and withal a skillful man-
ager. She attended fairs and markets
to dispose of her farm products, and battled
bravely for her family's sake for fourteen
years, three of which were years of terrible
famine, ending at last with the harvests of
1849. In 1853, however, she turned her face
toward America, the land of plenty and po-
tatoes, settling first in New Albany, Ind.,
thence in 1861 removing to Dubuque, Ia.,
thence in 1881 to Bedford, and two years
later to Greencastle. In company with a
granddaughter, Miss Maggie Atkins, she
traveled a day and a night on the cars in
her ninety-eighth year in returning from
Dubuque. She is averse to the cars, and
afterward walked two miles to the Green-
castle Junction, without even a walking stick,
rather than ride on a train. She has seen six
generations of her kin, though unable to
state the number of grand and great-grand-
children. She has three great-grand-
children, the children of Michael Higgins,
now of Jackson, Miss. Miss Maggie Higgins,
of that place, a great-grandchild, is twenty-
six years old. Of her children there are liv-
ing James, aged sixty-four, and John, aged
fifty-two. John, of Bedford, Ind., also a
second daughter, Mrs. Catherine McCann,
of Dubuque, Ia. In her prime she was five
feet seven inches high and weighed from
150 to 160 pounds. She is now quite stooped,
though remarkably free from the infirmities
of age. Her weight is, perhaps, be-
tween 90 and 100 pounds. She is quite
spry, and gets around the house and yard
with the aid of a slender walking stick. Her
hair is black and abundant as in youth. Her
features are round and compact. She has
retained her teeth but two, losing the first
in her one-hundredth year, the other
recently. She enjoys perfect second sight
and sews and knits without glasses. She
even makes her bed and performs other
tasks, more or less light, when permitted.
A few days ago, when taken with a pain
near the heart from which she has since
been confined to bed, she was inspecting a
walk constructed in front of the premises.
Her daughter keeps boarders, of whom she
is one. She reports at each meal and eats
heartily. She also enjoys a snail's pace. She
retires early and is a sound sleeper. She
loves to talk and speaks readily in English
and Irish. She also sings occasionally
snatches of Irish melodies learned in her
hood. She has an abundant fund of an-
ecdotes concerning troublous times and prom-
inent men, betraying intelligent obser-
vation and wonderful memory. She says but
little about Emmet, but is enthusiastic over
O'Connell, who was elected to Parliament
when her youngest son was four years old.
To her light-heartedness of youth she is a
wonderful degree, she has little of the
querulousness of age, though possessed of
marked preferences among her younger de-
scendants, for one of whom she is knitting
a pair of hose. No special alarm is felt over
her condition. She has been exceptionally
free from disease all her life, and it is
thought she will die more from natural
wearing out than disease.

AN ACTOR'S ESCAPADES.

Experiences That Were Rather Exciting
and Incongruous at Times.

"Jim the Penman," "The Banker's Daugh-
ter" and "Ermine" were "Across the
Continent" in a "Pulman Palace Car," says
the New York Press. There they met
"Count Monte Cristo" in company with
"Mardo, the Hunter." They were on "A
Love Chase" after "Paul Kaurvar," who
had escaped from Sing Sing through
"A Hole in the Ground," but they were
disappointed, as he went to "Siberia" to
have some "Fun on the Bristol," and such
"Confusion" was not to be "Forgiven."
"If they had been 'Hand in Glove' with
"Little Detective" or "One of the Finest"
they would have had a "Run of Luck," and
he would be "Held by the Enemy" until
"Tried by Jury." Unfortunately he was
"Masked for Life" and was "Unknown" to
them. But "King Henry V." had "By
Chance" known him in "A Passing Regi-
ment" as "The Quartermaster" and he was
created as "A Loyal Guard" and all went
to "Our Boarding House" and had some
"Mixed Pickles," served by "Fritz," "Our
Cousin German" and "Little Corinne." So
"After Dark" they "Skipped by the Light of
the Moon" "Over the Garden Wall,"
"The Mulligan Fiddle" and stayed
there till "Deacon Brodie" said "Our
Society" was in "Peril." "We, Us
& Co." therefore thought we would
go "Around the World in Eighty
Days," but got "Lost in London." I met
"The Star" and "The Sun" and "The
Lend Me Five Shillings," and as we had
any amount of "Cheek" we went to see
the "Fall of Babylon" in "The Old Home-
stead." That night "Joshua Whitcomb"
said the door was locked, but we had "A
Touch of Keys" and we obtained from
"The Forts Thieves," whom we met in
"The Streets of New York." They kindly
introduced us to the "Corsair" in "A Cel-
ebrated Case," and told "Rip Van Winkle"
that "Hazel Kirke" and the "Two Or-
phans" had been "Led Astray" by "The
Ticket-Leave Man" and "The Wife" of
"A Member of Congress," either from
"Muggs' Landing" or "Jarvis Section."
"Dr. Jekyll and Mr. Hyde" sent them "A
Great Pink Pearl," and started to find "A
Parallel Case" by "A Trip to Africa" on
"The Vatican." And thus ended "The
Romance of a Poor Young Man" who was
"One Against Many," and is now "Dead
to the World."

A Queer Kind of Reoster.

With commendable enterprise the man-
agers of the Zoological Gardens recently
purchased what was down on the list as a
fine emu cock, says the Cincinnati Com-
mercial, to mate with the hen that has for some
time been an attraction at the garden.
A brood of chicks in the early
spring were indulged in. But the birds
fought so that they were separated. Still,
the ornithologist insisted that they must be
kept together, until one morning the poor
old hen was found pecked nearly to death.
Then the new importation was confined in
a separate coop, and a day or two thereafter
rewarded its keeper by laying a big blue
egg that would fill a family market basket.
The society now announces: "For sale or
trade, a splendid specimen of emu (female),
warranted a good layer."

How He Became Famous.

The Walker, Iowa, News, says:
Our old friend, Robert Baird, of Mus-
catine, Iowa, has been Secretary of the
State Senate, and an active politi-
cian for years, but was never gener-
ally known until he had the colic,
and used Chamberlain's Colic, Cholera
and Diarrhoea Remedy, and got
into one of their advertisements.
"Now he is famous." Here is what
Mr. Baird said: "While I was in Des
Moines, I was taken with a severe at-
tack of bowel complaint. For two
days I suffered intensely, trying
several drug stores and paying them
for relief, but in vain. I finally
bought a small bottle of Cham-
berlain's Colic, Cholera and Diar-
rhoea Remedy, and two doses of that brought
me out all right. It costs less than
the drug-store preparations and I have
the balance for future use. I consider
it a grand remedy." 25 and 50 cent
bottles for sale by Osburn & Shoe-
maker.

Timely Advice.

Let us give the readers of the Ga-
zette a little timely advice. Hot
weather is coming and with it colic,
cholera morbus, dysentery, diarrhoea.
The only safe way to combat these
diseases, is to keep a reliable remedy at
hand, and all who have tried Cham-
berlain's Colic, Cholera and Diar-
rhoea Remedy will admit that it is
the most prompt, reliable and suc-
cessful medicine known for these
complaints. It costs but 25 or 50 cents
and must be the means of saving you
or your family much suffering, if not
life itself, before the Su tar is over.
For sale by Osburn & Shoemaker.

Oregon is one of the most productive States
in the Union. Its vast mineral regions con-
tain gold, silver, copper, iron and coal. Its
immense tracts of grazing lands support
thousands of cattle and sheep, and its ex-
tensive agricultural regions produce all the
cereals in abundance, the yield per acre being
some instances, the highest in the world.
Among the useful and valuable products of
the Webfoot State may be mentioned Oregon
Kidney Tea, which has proved a boon to
thousands afflicted with pain in the back and
kidney difficulties. It is purely of vegetable
composition and never fails. Sold by William
Pinniger.

The immediate symptoms of Dyspepsia, or
Indigestion, are a distressing sense of weight,
oppression and fullness in the stomach,
heartburn, loss of appetite, foul breath,
belching, flatulency, nausea, pains in the
shoulders and breast. Dr. Henley's "Bande-
rillon Tonic" promotes healthy digestion and
removes all unhealthy symptoms. Sold by
William Pinniger.

This is the season of the year when the
awful cold winds create such havoc with the
hands and complexion. Soft, white hands
and a clear "peachy" complexion can be
securely preserved by the frequent applica-
tion of Dunder's Specific. If rubbed into the
skin well it leaves no greasy surface. The
skin becomes it. Sold by William Pinniger.

It should be generally known that Dr. Hen-
ley's "Bandeillon Tonic" insures a hearty ap-
petite and increased digestion, cures nervous
depression and low spirits, overcomes lack of
energy and wakefulness, and will infuse new
life and strength into the weakest and ill-
Said by William Pinniger.

O. What a Cough.

Will you heed the warning. The signal
perhaps of the sure approach of that more
terrible disease, Consumption. Ask your-
selves if you can afford for the sake of saving
so cents, to run the risk and do nothing for it.
We know from experience that Shiloh's Cure
will cure your cough. It never fails. This
explains why more than a million bottles
were sold the past year. It relieves Croup
and Whooping Cough in children. Mothers
do not be without it. For Lane Back, Side or
Chest, use Shiloh's Porous Plaster. Sold by
Osburn & Shoemaker.

We have a speedy and positive Cure for
Catarrh, Diphtheria, Canker Mouth, and
Headache, in SHILOH'S CATARRH REM-
EDY. A New and Powerful Remedy. Use it
if you desire health and sweet breath.
Price 50 cents. Sold by Osburn & Shoemaker.

Dyspepsia and Liver Complaint.

Is it not worth the small price of 75 cents to
free yourself of every symptom of these dis-
tressing complaints? If you think so call at
our store and get a bottle of Shiloh's Remedy.
Every bottle has a printed guarantee on it.
Use accordingly, and if it does you no good it
will cost you nothing. Sold by Osburn &
Shoemaker.

Advice to Mothers.

Mrs. Winslow's Soothing Syrup should
always be used for children teething. It
soothes the child, softens the gums, allays all
pain, cures wind colic, and is the best remedy
for diarrhoea. 25 cents a bottle. Trade

LEGAL.

Summons.

In the District Court of the State of Nevada,
in and for the County of Washoe.
LENA M. FRANKLIN, Plaintiff,
vs.
A. Z. FRANKLIN, Defendant.

THE STATE OF NEVADA SENDS TO
A. Z. FRANKLIN, greeting: You are
hereby required to appear in an action com-
menced against you as defendant by LENA
M. FRANKLIN as plaintiff in the District
Court of the State of Nevada, in and for the
County of Washoe, and answer the complaint
therein within ten days after the service on
you of this summons (exclusive of the day of
service), if served in said County, or twenty
days, if served out of said County, but within
said district, and in all other cases forty
days; or judgment by default will be taken
against you according to the prayer of said
complaint. The said action is brought to re-
cover the jointure and dower of this Court
annulling the bonds of matrimony heretofore
and now existing between you and the said
plaintiff, on the ground of failure on your
part to provide for the plaintiff the common
necessaries of life, such failure and neglect on
your part not being the result of poverty
which could not have been avoided by ordi-
ary industry, all of which will more fully ap-
pear from the Complaint, which is on file in
the office of the Clerk of said Court at Reno,
in said County, and to which you are espe-
cially referred.

And you are further notified, that if you fail
to appear and answer said complaint, the said
plaintiff will apply to the Court for the relief
demanded.

In testimony whereof, I have hereunto set
my hand and affixed the seal of said Court
this 6th day of May, A. D. 1889.
[SEAL] T. V. JULIEN, Clerk.
[SEAL] S. JUDGE, Atty for Plff. 5-11

Dissolution of Partnership.

THE COPARTNERSHIP HERETOFORE
existing between Wm. Donaldson and
Min. Babcock, in the hotel business, in this
day dissolved by mutual consent. Min. Bab-
cock retiring.

Wm. Donaldson will continue the business,
collect all bills and pay all indebtedness of
the late firm.

WM. DONALDSON,
MR. BABCOCK.

Wadsworth, Nevada, June 1, 1889. 6-14ml

Estray Notice.

I HAVE THIS DAY IMPOUNDED ONE
dark brown horse, which the owner is re-
quested to redeem and take away.
S. W. UPSON, Constable.
Reno, June 6, 1889.

\$7500 to 25000 A MONTH can
be made working for
us. Agents preferred who can furnish a
horse and give their whole time to the busi-
ness. State moments may be profitably em-
ployed also. A few vacancies in towns and
cities. R. F. JOHNSON & CO., 109 Main
St., Richmond, Va. N. B.—Please state age
and business experience. Never mind about
sending stamp for reply. R. F. J. & Co.
